STRATEGIC PLAN AT A GLANCE

Caledonia Community Schools is a district with a strong track record of academic success. It is a thriving district with a unique blend of both rural and suburban communities. It is part of a supportive community that continually gives back to our students and families. Our strategic plan brings together - educators, families, volunteers, and our community alike - to collectively strive towards common goals.

Teaching & Learning

We WILL create a teaching and learning environment that will prepare all students with the necessary skills to successfully compete in the global economy.

We WILL have an articulated guaranteed and viable curriculum to support teaching and learning for all.

Whole Child/ Whole Community

We WILL develop a Positive School Culture to foster high levels of academic achievement and social engagement from early childhood through graduation.

We WILL promote student and community health and wellness, and identify and establish school/community partnerships that directly support academic and non-academic goals.

Fiscal Sustainability

We WILL align fiscal resources to serve as an accurate reflection of District-wide Goals and Priorities established by the Board of Education to meet the curricular and non-curricular needs for students and staff.

We WILL develop and establish a proactive preventative maintenance and infrastructure plan designed to provide safe, clean, and efficient facilities for students and staff.

We WILL transition to a modified needs-based budget where fiscal resources are strategically aligned to support district goals.

We WILL develop and implement forward-thinking plans to address district growth, capital needs, facilities, and major departmental purchases for the safe, orderly, and efficient operations of the district.

We WILL develop and maintain processes to ensure financial best practices and fiscal accountability.

Organization Coherence & Systemic Improvement

We WILL implement a conducive and structured information exchange environment for integrating students, parents, teachers, and the administration.

We WILL improve internal and external communication with the goal of creating open, two-way communication between the district and staff, parents, and the community.

We WILL provide safe and efficiently operated bus transportation to ensure the success of our students by increasing on-time performance, reducing student ride time, and lowering fuel costs.

We WILL systematically align programs, systems, and resources to support safe and efficient district operations.
