

A vibrant underwater scene on a dark blue background. At the top, pink coral branches with green leaves and white polka dots frame the scene. Several orange and white striped clownfish swim in the upper half. Two large, smiling pink jellyfish with long, wavy tentacles are positioned on the left and right sides. In the lower half, a large orange and yellow sea turtle swims on the left, and a blue stingray with white spots swims on the right. More clownfish are scattered throughout the bottom. The entire scene is filled with light blue and green bubbles of various sizes.
